Experience

Kansas City Kansas Community College
Front-end Developer, UX Focus
2024 – Present

Co-led product ownership and UX for the college's first self-service new-student orientation, completed by **200+ students** in its launch semester and reclaiming an estimated **67–125 staff hours** at peak enrollment. Guided the vendor's build from my Figma concepts across **20+ working sessions** to an on-schedule launch, and recruited pilot testers in the Admissions lobby. Audited the college site for **40+ WCAG 2.1 AA issues**, then interviewed blind students and staff to find the barriers scans missed.

CBANA Conference App
Freelance Product Designer
Mar 2026 – Jul 2026

Stepped into a mid-build iOS and Android app with no design lead and led its visual and interaction design, adopted by **75% of 1,200 attendees**. Turned the conference brand into a mobile design system and took the core Schedule screen from sketch to high fidelity through **2 rounds** of stakeholder testing, against a fixed **3-week** launch. Worked alongside a solo developer so the system shipped as designed.

National Association of Insurance Commissioners
Web / UX Intern
2023 – 2024

Owned the redesign of a customer support experience inside a regulated, standards-driven organization, raising task completion **25%**. Interviewed **10+ staff** to shape its information architecture, tested it with users, and built it in Drupal with developers within CMS constraints.

Oracle Cerner
System Engineer
2022 – 2023

Traced healthcare system issues to their root cause through user behavior, reports and configuration, and turned technical problems into clear, user-centered fixes with cross-functional engineering teams.

Education & Certifications

DePaul University	M.S. Human-Computer Interaction · 2026
University of Missouri–Kansas City	B.S. Information Systems · 2022
